California Freshmen Go Gradsile
Claremont, Calif. — The sopho-
more slump is the period of the
academic doldrums in most col-
leges, when drop-outs are high,
but at Harvey Mudd College "the
slump" comes in the freshman year,
says Dean Eugene Hutch-
ings.
In an effort to combat this,
the faculty and administration
have announced that no grades
will be given in the freshman year,
starting this year. Stud-
ents will be notified of "has-
tudied" or "was absent/illness/
work" work. However, all fresh-
men work that is not satisfactory
must be made up during the sopho-
more year.

Working on the committee
which prepared the proposal
evaluation and grading were fac-
ulty members, the registrar and
a senior student, the chairman of
the Student Academic Commit-
tee. This year system eliminates
the emphasis on grades, encour-
ges the student to study for the
sake of learning, and allows the
instructor greater freedom to
develop course material in the
some classes were established
in the Essex building on Fifth
Avenue and, more recently, in
the Koches building on East Elm
Street.
Enrollment this year climbed
to an all-time high of about 1,100
daytime students and about 250 in
the evening division.
At a cost of about $600,000, the
Dahl and Swarthmore buildings
on First Avenue are winging
so students will no longer
attend classes in the high
school building. The Canton
YMCA and St. Mary's gym are
also used for physical education
classes. About 40 per cent of the
student body are commuting
daily, some of them as many
as 60 miles daily,
Sept. 30: Student Senate elections, Freshmen representatives
Oct. 5: Crusaders Day, sponsored by Student Senate
Oct. 12: Doug Cwes, Church and Dance at 8 p.m., High School auditorium, sponsored by CCC Concert and Lecture Board.
Oct. 15: ACT Test, 8 a.m., High School.

On Other Campuses...

The only limit imposed on the student will be in forbidding too narrow a choice.

Each will be presented with a list of areas in which he can expect to be examined at the end of the first two years. These will comprise the disciplines that normally make up the liberal arts course of study: the humanities, the natural sciences, and the social sciences.

Program II students will live with their families in the remainder of their curriculum. They will have the same opportunities in the use of facilities, courses of study, and laboratories, in scholarship and financial aid, as offered to students in Program I. Regular curricular activities as open to all. These will be expected, like those in the standard Program I, to be completed during the academic year.

Salt Lake City, Utah — A 56-student, independent study program enrollment is expected at the University of Utah during the next 11 weeks. The program was released by the University’s Office of Student Affairs.

Prepared under the direction of the Claude W. Grant, the enrollment projection report will be used in the University’s long-range academic plans. A total of 61 students are expected to climb to the 20,000 mark during the 1969-70 academic year, according to University officials.

Nearly 25,000 students will enroll in the University in 1973-74. Dr. Grant said the campus will double its enrollment steadily through 1978 when it is expected to reach 37,000. As a whole, the entering freshmen class of 1972-73 was larger last year than it is likely to be for the next two or three years.

Based upon a heed crowed of students not returning. This figure is one through twelve in all Utah schools, according to the projections by faculty, students, and enrollment peak by college class. The forecast extends only until the end of the current school year. About 15 hundred first year students will be eligible to become entering college freshmen.

In gathering data for the report, the Office of Student Affairs made a count of children enrolled in the public schools in the 11 school districts of the state of Utah. Enrollment between 1958 to 1964-65. Each class was divided into five major subject areas to determine survival ratio concerning the on-and-off-migration analysis. The subject included English, geography, the growth of the country, dropouts, and so on.

These ratios were then used to pre-formulate the school’s campus population number. However, these figures do not apply only to those children who are already enrolled in school.

Blackboards of Our Own
Narrow staircases, walls in church basements and the absence of blackboards and bells might dismay students attending Canton Community College for the first time, but sophomore feel different.

To those who knew CCC when it was a cracker-box of four or five classrooms and two hallways sandwiched in between a high school cafeteria and a bunch of righteously restrained 11th, 12th and 11th grade students, walls, chalkboards, bells and school buses that we can call our own are an unexplainable blessing.

Breaking away from the high school, the new CCC has given us identity. Now when people say “Canton College” they think of Dahl Hall, the Ag-Dept building, and the room-to-be-completed Dahl Hall, not just a few rooms in the corner of a high school. CCC has its own newspaper, yearbook, work, March band, basketball, cheerleaders, and outstanding athletic teams.

Also we have expanded library facilities, a college bookstore, more full-time instructors, and additional courses.

In short, CCC is on its own and in its way.

COMING UP...

Radioisotopes are being used in agriculture, mining, oil wells, and produce space rockets, among other things.

The Atomic Industrial Forum study shows that these “wonder atoms” could be stopped up by modulating old regulations.

FRENCH FORECAST SUPERSONIC STYLE

Special to Students — Anyone having social liaisons such as engagements, marriages, "engagements" or other "surprises" of former CCC students may share the news with the rest of the student body by writing a note about these liaisons to the office in the Lancer Box in the Dahl lobby.

A new wave of air travel is being hailed by this Dior model wearing a one-piece jump suit created for the supermodel hostess of 20 years now from town.

The hooded silhouettes, shoulder seam and full-length stretch fabric trimmed with light blue metallic-finish leather are designed by Dior in honor of Air France’s 20th anniversary of transatlantic service.

Steak simplicity marks both the slash pocket lines and the fitted hooded helmet with its long arms. The design allows for panel closings accent the circular contour of the model as does the use of the aircruises and telephone numbers of the city’s churches are listed on the following pages of the CCC student handbook.

Radioisotopes are being used in agriculture, mining, oil wells, and produce space rockets, among other things.

The Atomic Industrial Forum study shows that these “wonder atoms” could be stopped up by modulating old regulations.

Kalamazoo, Mich. — Telling faculty members at Western Michigan University they should de-emphasize final examination, Dr. Russell Shier, provost and vice president, made his views known to the faculty members present in the forum, said that the switch to the exam is a periodic plan had resulted in the elimination of the 10-day examination period, and students were often forced to take several examinations in one day.

Many students had complained about the rigorousness of the exam and that this year’s time last year, and Dr. Seibbert’s recommendations seemed to be aimed at a solution to this problem. He said that instructors should put more time on the frequent tests, and cover areas thoroughly.

He also asked faculty to observe a day after tests to allow time to review the material and require students to turn in a term paper a week before the semester ends. This measure again was urged to prevent the overcrowding of the final examinations at the end of the semester.

In closing, Dr. Seibbert reported that WMU has very few provisions in switching to a no-exam system, and the examination period was the largest the campus expanded so far. He believes that this lack of difficulties is a direct result of the fact that Western studied closely all the aspects of the tri-marker system.

A unique feature of Western’s tri-marker is that Western scored 50 points on two 18-week semesters and the third semester is divided into two 7-week sessions. The first of these short sessions is prior to the beginning of the 15 weeks, which is the approximate time that other universities are closing for the summer.

Waterloo, Iowa. — A pioneering 2-year program in independent study will be offered by the College of Education of the University of Waterloo.

Students selected will be from all class levels and must demonstrate pursuit any areas of their choice. Examination of the academic potential of the subject, the total of any program consignment will not be given, nor will grades be recorded. The faculty member will be supplemented by a group of interested and well trained instructors.

Emphasis throughout will be the individual student and his learning.

To be known as “Program B,” the plan in a dramatically simplified concept of the principles inherent in College of Education Independent Study which was introduced in 1966. It is a program that latter requires all students to have a special solution to independent academic work.

Each student will be assigned a guiding student advisor "to act as proctor, critic, and guide. "Students will be expected to submit formal entries in the courses and other areas of study, both orally and in writing. This program will be sponsored by the College of Education, and will be used when members of Program B and those of Program A have questions and discuss each other. Students enrolled in Program B will be encouraged to encourage students to fill out Form B and work with others of the Program to seek answers to problems with questions with each other. Students enrolled in Program B will be encouraged to encourage students to fill out Form B and work with others of the Program to seek answers to problems that are of common interest.

These activities will be encouraged to encourage students to fill out Form B and work with others of the Program to seek answers to problems that are of common interest.
COSSACK CHORUS, DANCERS TO PERFORM
HERE OCT. 13

The world famous Gem, Platoon Don Cossack Chorus and Dancers will perform Oct. 13 in Canton Senior High School.

Sponsored by Canton Community College, the Cossacks are the second in a four-day entertainment program offered by the college for entertainment of high school students and area residents. Students will be admitted for $1; adult ticket is $2.

Roger Williams, famed concert and television pianist, will play in Canton on Nov. 1. Reserved seats will go on sale for the concert after Oct. 1.

The Don Cossack group is becoming as familiar a part of the American scene as baseball and circuses, having presented more than 3,500 concerts in the United States in the last 30 years.

Now in their 21st annual tour, the Cossacks boast of having missed only one performance, when their locomotive of their train exploded in Kentucky. The group even made all their dates in the severe snowstorms that blanketed the entire northeast last winter.

The Cossacks, all of them now American citizens, will present a varied program. The chorus will sing folk songs, long songs, liturgical music, Cossack songs, and a group of English songs.

A highlight of their program will be authentic dances of the Cossack regiments, national dances and the hair-twisting dagger dance performed by the inimitable G. Solodukhin, probably the most photographed Cossack in the world. He has performed in dozens of motion pictures, been featured as a daring horseman by Ringling Brothers and Barnum and Bailey Circus, and performed the dagger dance hundreds of times in the last decade since he joined the Cossack troupe.

In the current program, he is featured in the Longiski, a barbaric Cossack dance which begins on the end hill of a peasant song and conclusion in a wild dance of jubilation. With the entire chorus providing a vocal background, he performs the traditional dance with daggers which never fails to stir his audience.

Membership in the chorus has always comprised the best of the vocal talent obtainable among the White Russian émigrés who fought Communism in Russia as early as 1918-1920 and who actually may be considered as the pioneers in the fight against world Communism.

Organized in Prague in 1923, the chorus has been headed by Nicholas Konshutko, who is chorus leader and administrator. The group has toured all five continents and has 19 times crossed the equator. The chorus has travelled on 108 different ocean liners and visited 67 different countries.

The chorus of 25 men is said by the New York Times to be "among the best choral groups to be heard in our concert halls."

BRIEF BATTLE

The shortest war ever recorded was the one between the United Kingdom and Zanzibar on August 27, 1896. It lasted from 8:02 to 8:49 a.m.

The New Colony Six lead vocalist wails for 700 teens at the Friendship Festival Teen Dance.

SAFETY TIP

Each year about 30 children, most of them under 6, get trapped in refrigerators and suffocate, according to the U.S. Department of Agriculture. A refrigerator that is temporarily out of use should be encircled with strong filament tape or a chain with a padlock. The doors of a refrigerator that is to be junked, discarded or abandoned should be removed.

FAVORITE SPUDS

The U.S. Department of Agriculture reports that Americans eat more potatoes mashed than in other forms.

SAY IT IN PORTUGUESE

Pretty Luftansa Airlines hostess Mariana speaks Portuguese. She offers those phrases for visitors to Brazil to help make your stay more pleasant: *Se faz favor* ("Please"), *Como esta* ("How are you"), *Obrigado* ("Fine, thank you"), *Boa viagem* ("Good day"), *Adianto* ("Goodbye"), *Muito obrigado, Mariana.

FIRST MAIL BOX

The mail box was invented in 1910 by Thomas Brown, who later became governor of Florida.

EDDIE the EDUCATOR

Public high schools differ widely in size, organization, and number of graduates going to college, according to Dr. James R. Cavan's recent study.

Study Tips For Teens

As every parent knows, the teenage period is an extremely important in the development of habits that will influence his adult life.

While some of the habits parents develop during these years may occur to dispose of, authorities say that good study habits learned and practiced during the school years will improve the student's efficiency throughout his life, no matter what occupation he pursues.

Experts at Temple Oaks Educational Center in Lake Bluff, Ill., suggest some simple rules that will help develop good study habits:

1. The student should have a definite place, a desk or a table, to do the work. The chair should be a straight chair—not a loping chair.
2. All the necessary tools should be close at hand, because it's hard to concentrate if you have to get up and hunt for each tool as you need it. One of the best “cups” is the most important single resource of home study is the encyclopedia. It should be on a shelf around which students can build a workable and enjoyable personal library.
3. All possible distractions should be eliminated. This means no radio, TV, magazines, or other things which might tempt you away from your study. It's unusual to study alone, too.
4. Be sure you know your assignments are. The best way to do this is to make accurate notations in class while the teachers are outlining the assignments.
5. Study right away—don't wait for an inspiration. Inspiration comes after you're started, not before.
6. Plan your study session. A good first step is to outline, on paper, what you plan to do. Do the hardest things first. If you have writing to do, do it before you tackle your reading assignments.
7. Work rapidly after you get started, but take rest periods long enough to relax you without letting them make you lose interest, or lose trouble getting started again.
8. Finish one assignment at a time. If you jump from one thing to another, you're likely to get those assignments to be completed. By practicing good study habits, you'll have a better chance of succeeding in any area, and you'll have a better chance of succeeding in any area, and that's worth aiming for.

The longest word in literature was coined by the Greek, Aristophanes. In Greek, it has 170 letters (182 if transliterated into English), and means a pack of left-over!
CCC faculty men start the summer right by completing the paint job which caused the downfall (literally) of Bill Randol, high school counselor, shown here directing his volunteers help from a chaise lounge. He has shed his coat and the "painters" resumed their roles as educators. They are, from left: Coach Don Heeren, Carl Jackson, Donald Mortvedt, Tom Zimmart and Tom Juravich. (Tom Gayton photo)

Presenting the frosty taste of Fresca. It's a blizzard.

Fresca is the new cold drink with the frosty, cold taste. And of course, it's sugar-free.

Just how refreshing is Fresca? This refreshing: icy, biting, bold, cold, frosty, wintry, breezy, shivering, shimmering, shuddering, sizzling, springy, sparkling, splashing, nipping, chilling, lively, light, bright, brisk, bouncing, bubbling, piercing, nearly freezing, and almost shocking.

There's never been a taste so refreshing. It's a blizzard.
