

Do you have a student at 1st through 6th grade levels?

COLLEGE

for kids!

Summer 2022

June 21st & 23rd from 8:30 - 11:30

Cost is \$10 per day for 3 sessions - choose one morning or both!

*Thank you to the United Way for making this discounted price possible!*

*Please let us know if you need further financial assistance.*

TUESDAY the 21st:

**8:30-9:30**

**Layers of the Earth**

**(Heather Vining of Rushville SRC)**

Geology fun with temperatures, tints, and textures as we "dig" beneath the surface of our world. We will craft and create as we learn about the hundreds of miles under our feet and over our heads.

**9:30-10:30**

**Making Monarchs**

**(Andrea Kliffmiller from The HUB)**

In this program, we will be making a painted monarch butterfly! We will combine basic painting techniques, use of oil pastels, symmetry, and gradation to create our representation of this species.

**10:30-11:30**

**Chalk Bombs**

**(Andrea Barbknecht from Canton SRC)**

Students will create targets, then throw water balloons filled with a special mix to "explode" into bright colors on the targets. Participants will also receive instructions for more chalk fun at home!

THURSDAY the 23rd:

**8:30-9:30**

**Cooking Fun**

**(Janet Young, Rushville Center Director )**

Who needs grown-ups cooking for us? We can make it ourselves! Learn how to make Breakfast Sushi, Sandwich on a Stick, and, since we can't forget dessert: Apple Pie in a Cup. A tasty class!

**9:30-10:30**

**Blueprints: Plans for Things**

**(Schuyler Isley, MBA)**

Today we're going to learn about blueprints and how they got their name - -way back in 1842-- with the cyanotype process. We'll then come up with an idea and make our own "blueprints" to take home.

**10:30-11:30**

**Illinois' Aquatic Food Chain**

**(Van Grissom of IDNR)**

This fascinating presentation starts with plankton, then fathead minnows and crawfish, and moves up the food web to bullhead catfish, largemouth bass, and flathead catfish. Fishy fun to finish our day!
